About the Valley Conservation Council

Established in 1990, the Valley Conservation Council (VCC), a non-profit citizens' organization, promotes land use that sustains the farms, forests, open spaces, and cultural heritage of the Valley of Virginia. Its efforts focus primarily on private citizen involvement in voluntary land conservation measures and the establishment of sound land use policy throughout its 11-county service area, from Frederick in the north to Botetourt in the south.

Acknowledgments

The main body of research and the narrative for the report was undertaken by Valley Conservation Council member Carole Nash, Department of Sociology and Anthropology, James Madison University. John Hutchinson, VCC Special Projects Coordinator, authored the section on conservation measures. VCC member Robert P. Brown, III assisted with the historical research and directed photography for the report. Sara Hollberg served as primary editor for the report, with assistance from Faye Cooper and Martha Hodkins Green. Martha Ross provided technical assistance. GIS maps were produced by Fred Garst of the Virginia Natural Resources Information Service, USDA Natural Resources Conservation Service. Gerry Cervenka of Editype designed and produced the report, which was printed by Mid-Valley Press.

Special thanks are extended to the following individuals and organizations for their guidance and support of this project:

Angela Andrews, Virginia Transportation Research Council
Anthropology Students enrolled in Valley and Regional Studies, Department
of Sociology and Anthropology, James Madison University, Fall 1994
