Voluntary Protection on Private Land

Conservation Easements (6)

Conservation easement figures are as of Dec. 31, 2002. For analysis and information, see pp. 39, 42.

Agricultural & Forestal Districts (1)

Ag District figures are as of Sept. 2002. For analysis and information, see pp. 38 - 41.

Gray shaded areas are **Public Lands** owned by federal, state, or local governments. (Map may not contain all local government sites.)

Cross-hatched areas are **Natural Heritage Sites**, identified by the Virginia Department of Conservation and Recreation as containing rare and exemplary natural communities. These sites are not necessarily protected. See p.67 for analysis.

Map produced by the Valley Conservation Council, May 2003. Sources: Virginia Outdoors Foundation (easements), Valley Conservation Council (ag districts), Virginia Department of Conservation and Recreation (public lands), and VDCR Natural Heritage Program (natural heritage sites).

Principle 1: Conserve Natural and Scenic Assets

County Information Sheet

Page County

Page County, nestled in a narrow valley between the Blue Ridge and the Massanutten ranges, ranked 3rd in agriculture both in the state and in the VCC region in 1997.

Main agricultural products are poultry (it is one of the top poultry counties) and to a much lesser extent cattle. Total market value of agricultural products in 1997 was \$115,209,000, a whopping 157% increase over its 1987 total. Livestock and poultry made up 98% of that value, despite a more than tripling in the value of crops over the decade. The census showed a gain of 52 farms (by far the greatest gain in the region) although the gain in acreage was only 579 acres. This reflects the increase in poultry operations, which have exploded in the county since 1987 and do not require much land.

Page County does not rank as high in forestry terms, in part because there is little forestland that is not publicly owned. The value of timber harvested in Page County was \$1,041,070 in 2000, a huge increase from just \$45,303 in 1986. The county ranked 8th in the region in timber harvest value in 2000, up from 11th in 1986. All measures increased. Bucking a regional trend toward increased dominance of hardwood, in Page County hardwood decreased from 98.4 percent of the harvest in 1986 to only 49.7 percent in 2000.

Timber Harvest Volume and Value
Page County
(in thousand board feet)

	1986	2000	Change
Volume:			
Pine Sawtimber	6	4,950	NMF
Hardwood Sawtimber	684	1,682	146%
Subtotal Sawtimber	690	6,632	861%
Small Dimension	--	263	525%
Total Volume :	690	6,895	899%
Value (\$):			
Pine	\$ 710	\$523,213	NMF
Hardwood	44,593	517,857	1061%
Total Value	\$45,303	\$1,041,070	2098%
Percent Hardwood	98%	50%	
Rank in Region	11	8	
Rank in State	--	67	

Source: Virginia Department of Forestry, July 2002
Note: Volume is based on forest products tax receipts; value is based on average county stumpage costs. The standard measure for saw timber is thousand (mille) board feet abbreviated mbf. A tree 22 inches at breast height with 48 feet of usable stem would yield approximately 500 board feet.
